Such a morsel, he said, not only
keeps the mouth watering but stimulates

ing the salivary glands, but it also induces a flow of the gastric juices by acting on the glands of the stomach. These glands it brings into play before any portion is swallowed. It is, in fact, telephoning down to the stomach to say that something good is coming, and the stomach immediately prepares itself for its reception.

A New Friend

A Few weeks ago a man who "was tired of waiting" sold his machine to a glib friend.

A few days later the purchaser approached the man from whom he had bought the car, with a troubled expression on his face and in the tone of one who has determined to do a disagreeable thing, and so it was said:

"Look here, Jack," he began, "you're a friend of mine, and I don't want you making any attacks on your credit. But you told me that you had been arrested twice in the last six months."

"Well, I've tried my best and I can't get her up to five miles an hour. Would you mind telling me how to do it?"

"I'm afraid," he had no small amount of sympathy for him, "that you have made a wrong answer card. Really, I am sorry." He turned to the motor car and said, "This is all right."

BEARISH TREND IN N. Y. STOCKS | **STATE ST. NEWS FOR INVESTORS**

Many bear stop-loss orders are being put out on the advance new shares.

George is absorbing American bond issues, and is ready to take the offerings, and the market is in the same. The general sentiment is that the New York stock market has discounted pretty thoroughly any evils that may be in store for it.

\$ \$ \$

In the last few weeks the agricultural nation has been a highly sustaining factor, and its effect will be more apparent as the days go on. It is too early as yet to determine what the harvests are to be, but with the increased acreage there ought to show a pretty yield than was the case in 1910.

\$ \$ \$

The rumors are heard frequently enough that the authorities are looking for a

Since the first of the year railroads and industrial corporations have sold nearly \$5,000,000 of short-term notes. Absorption of the enormous volume has been aided by the low rates for money and the certain trend of the stock market.

...common stocks are safe investments because the holders could throw the company into the receivership should default be made in payment of the principal, and then allow this stockholders would

banks and trust companies hold the largest amount of money in their hands, and rather than loan these funds at high low rates they have picked up large quantities of high-grade short term notes yielding from 4 to 4½ per cent. a year. These notes form a large part of the increase in securities reported in the statement recently made to the Comptroller of the Currency.

Banks prefer short term notes of lending
to bonds, because they can
be sold in large blocks at less concession
than bonds. The banks and trust
companies have not been alone in this
game, for the uncertain trend of the stock
market, together with the duress to trade
of the banks who always keep their money
ready to purchase notes.

Wingers are selling short in a market which has been hammered and liquidated, and on technical grounds alone, it ought to advance sharply on announcement of a really drastic decision from the Supreme Court. At the moment intrinsically, it does not enter into the making of a guess. A short interest of considerable magnitude is outstanding; the men responsible for it are rich and daring and they have been handled severely before they admit defeat.
